

Appendix 6. Summary of the condition assessment of wetlands in MAES-HU (indicators, scores and threshold values)

6.1 Indicators and scores (wetlands)

Indicator	Unit	Rule / Score
Proportion of wetlands	220 m radius	IF proportion > 80% → +2
		IF proportion 51-80% → +1
		IF proportion 21-50 % → + 0
		IF proportion 0-20% → -1
Frequency of water cover (<i>Copernicus HRL</i> Water and	20 m cell	IF value >38% → +2
		IF value > 0 but <38 → +1
Presence of surface water and temporary surface water	220 m radius	IF WWPI>0 cell or surface water cell is present within the 220 m radius → +1
Heterogeneity of wetland types	220 m radius	IF proportion of a different wetland category >=10% → +1
		IF proportion of a different wetland category also >= 10%
Proportion of seminatural areas	220 m radius	IF proportion > 80% → +2
		IF proportion 51-80% → +1
		IF proportion 21-50 % → + 0
		IF proportion 0-20% → -1
Presence of roads	20 m cell	IF road is present → -1

6.2 Thresholds for the simplified scores (wetlands)

Score	Simplified score
-3	1
-2	1
-1	1
0	2
1	2
2	3
3	3
4	4
5	4
6	5
7	5
8	5
